Market Risks

The general market performance of securities is dependent, in particular, on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the Product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/ or their stock exchanges or markets taking place during the term or upon maturity of the Products. Such occurrences can have an effect on the time of redemption and/or on the value of the Products.

No Dividend Payment

This Product does not confer any claim to receive rights and/ or payments of the Underlying, such as dividend payments, unless explicitly stated herein, and therefore, without prejudice to any coupon or dividend payments provided for in this Termsheet, does not yield any current income. This means that potential losses in value of the Product cannot be compensated by other income.

Credit Risk of Issuer

Investors bear the credit risk of the Issuer of the Product. The value of the Products is dependent not only on the Underlyings, but also on the creditworthiness of the Issuer, which may change over the term of the Product.

The Products constitute unsubordinated and unsecured obligations of the Issuer and rank pari passu with each and all other current and future unsubordinated and unsecured obligations of the Issuer. The insolvency of the Issuer may lead to a partial or total loss of the invested capital.

Secondary Market

The Issuer or any third party appointed by the Issuer, as applicable, intends, under normal market conditions, to provide bid and offer prices for the Products on a regular basis (if specified in the section "General Information"). However, the Issuer makes no firm commitment to provide liquidity by means of bid and offer prices for the Products, and assume no legal obligation to quote any such prices or with respect to the level or determination of such prices. In special market situations, where the Issuer is unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices may be temporarily expanded, in order to limit the economic risks of the Issuer. Investors must be prepared to hold the Securities until the Redemption Date.

Illiquidity Risk

One or, if applicable, more of the Underlyings might be or become illiquid over the life time of the Product.

Illiquidity of an Underlying might lead to larger bid/ offer spreads of the Product and/or to an extended time period for buying and/ or selling the Underlying respective to acquire, unwind or dispose of the hedging transaction(s) or asset(s) or to realise, recover or remit the proceeds of such hedging transaction(s) or asset(s) which might implicate a postponed redemption or delivery and/ or a modified redemption amount, as reasonably determined by the Calculation Agent.
