9. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). The Issuer has determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer may partially or wholly fail to meet its obligations under the Securities. Investors should therefore take the creditworthiness of the Issuer of the Securities in their investment decision into account. Credit risk means the risk of insolvency or illiquidity of the Issuer, i.e. a potential, temporary or final inability to fulfil its interest and repayment obligations on time. An increased insolvency risk is typical of issuers that have a low creditworthiness ([risk related to the creditworthiness](#)).
- Investors are subject to the Issuer's liquidity risk. Liquidity is essential to the Issuer's businesses. Liquidity risk is the risk that the Issuer either does not have sufficient financial resources available to meet its obligations as they fall due or can only secure such resources at excessive cost. Liquidity risk is assessed and managed under the Individual Liquidity Adequacy Assessment and liquidity risk framework. The Issuer's liquidity could be impaired by an inability to sell assets or unforeseen outflows of cash or collateral. This situation may arise due to circumstances beyond the Issuer's control (liquidity risk).
- Third parties that owe the Issuer money, securities or other assets may not pay or perform under their obligation. Defaults by one or more of these parties on their obligations to the Issuer due to bankruptcy, lack of liquidity, downturns in the economy or real estate values, continuing low oil or other commodity prices, operational failure, or other factors, or even rumours about potential defaults by one or more of these parties or regarding a severe distress of the financial services industry generally, could have a material adverse effect on the Issuer's results of operations, financial condition and liquidity. Bankruptcies, downgrades and disputes with counterparties as to the valuation of collateral may also tend to increase in times of market stress and illiquidity. Any of these developments or losses could materially and adversely affect the Issuer's business, financial condition, results of operations, liquidity and/or prospects (risks related to the business activities).
- The majority of the requirements of the EU Bank Recovery and Resolution Directive have been implemented in the UK through the UK Banking Act 2009, as amended and related statutory instruments (the "UK Banking Act"). The UK Banking Act provides for a "resolution regime" granting substantial powers to the Bank of England (or, in certain circumstances, HM Treasury), to implement resolution measures with respect to a UK financial institution (such as the Issuer) where the UK resolution authority considers that the relevant institution is failing or is likely to fail, there is no reasonable prospect of other measures preventing the failure of the institution and resolution action is necessary in the public interest. Investors should be aware that the exercise of any such resolution power or even the suggestion of any such potential exercise in respect of the Issuer could have a material adverse effect on the rights of holders of Securities, and could lead to a loss of some or all of the investment. The resolution regime is designed to be triggered prior to insolvency of the relevant institution, and holders of securities issued by such institution may not be able to anticipate the exercise of any resolution power (including exercise of the "bail-in" tool) by the UK resolution authority. Further, holders of securities issued by an institution which has been taken into a resolution regime will have very limited rights to challenge the exercise of powers by the UK resolution authority, even where such powers have resulted in the write down of the securities or conversion of the securities to equity ([risks related to resolution powers](#)).

What are the key risks that are specific to the Securities?

The specific risk factors related to the Securities are described below:

- The original issue price for the Securities will exceed the estimated value of the Securities as from the trade date, as determined by reference to the Issuer's pricing models and taking into account the Issuer's credit spreads. The difference between the estimated value of the Securities as of the time the terms and conditions of the Securities were set on the trade date and the original issue price is a result of many factors, including among others on issuance (the underwriting discount and commissions where permitted by applicable law), the expenses incurred in creating, documenting and marketing the Securities and the Issuer's own internal funding costs (being an amount based on what the Issuer would pay to holders of a non-structured security with a similar maturity). The difference may be greater when the Securities are initially traded on any secondary markets and may gradually decline in value during the term of the Securities.

Risks relating to certain features of the Securities:

- The terms and conditions of the Securities provide that the return on the Securities depends on the performance of the Underlying Asset, so that the investor will be exposed to the performance of the Underlying Asset. This means that, if the Underlying Asset fails to meet a relevant threshold for the calculation of any redemption amount, the investor may lose some or all of the initial investment.
- The terms and conditions of the Securities provide that the Securities are subject to a cap, so that the investors's ability to participate in any change in the value of the Underlying Asset(s) over the term of the Securities will be limited, no matter how much the level, price, rate or other applicable value of the Underlying Asset(s) may rise beyond the cap level over the life of the Securities. Accordingly, the return on the Securities may be significantly less than if the investor had purchased the Underlying Asset(s) directly.

Risks relating to the Underlying Assets

- The return on the Securities may depend on the performance of the Underlying Asset(s). The level, price, rate, net asset value or other applicable value of the Underlying Asset(s) may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities.
- The investor should not regard any information about the past performance of the Underlying Asset(s) as indicative of the range of, or trends in, fluctuations in the Underlying Asset(s) that may occur in the future. Underlying Asset(s) may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on the Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Asset(s) which, in turn, would have a negative effect on the value of and return on the investor's Securities.
- Various unpredictable factors may affect the performance of Exchange Traded Funds. An Exchange Traded Fund may seek to track the performance of an index (in relation to such Exchange Traded Fund, an "**ETF underlying index**"), or the performance of certain assets, contracts and/or instruments which may be invested in or held by the Exchange Traded Fund. The performance of an Exchange Traded Fund may be dependent upon company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy of the underlying companies that comprise the ETF underlying index of such Exchange Traded Fund, or upon the value of such assets, contracts and/or instruments invested in, held by or tracked by the Exchange Traded Fund as well as macroeconomic factors, such as interest and price levels on the capital markets, currency developments and political factors. Fees charged by the investment manager of the Exchange Traded Fund may reduce the performance of the fund as compared to the ETF underlying index.
- The return on the Securities will not be linked to dividends or any other distributions paid on the Shares. Accordingly, the investors may receive a lower return on the Securities than they would have received had they invested directly in the Underlying Asset(s).
- The Securities may be adjusted or redeemed prior to maturity due to the occurrence of an additional disruption event (i.e. a change in law, a hedging disruption or increased cost of hedging). Any such adjustment may have an adverse effect on the value of and return on the Securities and the amount the investor receives following an early redemption may be less than the initial investment.
- Marex acts as a broker, trader, research provider and market maker. In those and other capacities, Marex purchases, sells or holds a broad array of investments, actively trades securities, derivatives, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for its own account, and will have other direct or indirect interests, in the global fixed income, currency, commodity, equity and other markets. Any of the financial market activities of Marex may, individually or in the aggregate, have an adverse effect on the market for the Securities, and an investor should expect that the interests of Marex or its clients or counterparties will at times be adverse to those of investors in the Securities.

Quali sono i principali rischi che sono specifici per l'Emittente?

L'Emittente è soggetto ai seguenti rischi principali:

- L'Emittente potrebbe non riuscire ad adempiere, parzialmente o interamente, alle proprie obbligazioni in relazione ai Titoli. Pertanto, gli investitori dovrebbero tenere in considerazione il merito creditizio dell'Emittente dei Titoli nella propria decisione di investimento. Rischio di credito significa il rischio di insolvenza o illiquidità dell'Emittente, ossia una potenziale, temporanea o definitiva incapacità di adempiere puntualmente alle obbligazioni di pagamento degli interessi e agli obblighi di rimborso. Un rischio di insolvenza elevato è tipico degli emittenti che hanno un merito creditizio basso (rischio legato al merito creditizio)
- Gli investitori sono soggetti al rischio di liquidità dell'Emittente. La liquidità è essenziale per le attività dell'Emittente. Il rischio di liquidità è il rischio che l'Emittente non abbia sufficienti risorse finanziarie disponibili per adempiere alle obbligazioni in scadenza o possa ottenere tali risorse solamente ad un costo eccessivo. Il rischio di liquidità viene valutato e gestito in conformità al *Individual Liquidity Adequacy Assessment* e al *liquidity risk framework*. La liquidità dell'Emittente potrebbe essere compromessa da una incapacità di vendere beni o imprevisti flussi finanziari in uscita di liquidità o di garanzie. Questa situazione può verificarsi a causa di circostanze al di fuori del controllo dell'Emittente (rischio di liquidità)
- Terze parti che hanno un debito nei confronti dell'Emittente di denaro, strumenti finanziari o altri beni potrebbero non pagare o adempiere alla propria obbligazione. L'inadempimento di una o più di queste parti alle proprie obbligazioni nei confronti dell'Emittente a causa di fallimento, perdita di liquidità, calo nell'economia o dei valori degli immobili, continui abbassamenti dei prezzi del petrolio o di altre materie prime, fallimento operativo o altri fattori, o persino voci su potenziali inadempienze da parte di una o più di queste parti o riguardanti un grave turbolenza del settore dei servizi finanziari in generale, potrebbero avere un effetto negativo sostanziale sui risultati operativi, sulla condizione finanziaria e sulla liquidità dell'Emittente. I fallimenti, i declassamenti del rating e le controversie con le controparti in merito alla valutazione delle garanzie possono anche tendere ad aumentare in periodi di sofferenza dei mercati e illiquidità. Ciascuno di questi andamenti o perdite potrebbe incidere sostanzialmente e negativamente sull'attività, sulla condizione finanziaria, sui risultati operativi, sulla liquidità e/o sulle prospettive dell'Emittente (rischi relativi alle attività commerciali)
- La maggior parte dei requisiti della Direttiva UE sul Risanamento e la Risoluzione delle Crisi Bancarie (*EU Bank Recovery and Resolution Directive*) è stata implementata nel Regno Unito attraverso lo UK Banking Act del 2009, come modificata, e i relativi atti legislativi (lo "UK Banking Act"). Lo UK Banking Act prevede un "regime di risoluzione" che conferisce poteri sostanziali alla Banca d'Inghilterra (*Bank of England*) (o, in determinate circostanze, al Ministero del Tesoro (*HM Treasury*)), per attuare misure di risoluzione nei confronti di un'istituzione finanziaria del Regno Unito (come l'Emittente) laddove l'autorità di risoluzione del Regno Unito ritenga che l'ente in questione sia in dissesto o a rischio di dissesto, non vi siano ragionevoli prospettive di altre misure per prevenire il dissesto dell'ente e l'azione di risoluzione sia necessaria per l'interesse pubblico. Gli investitori dovrebbero essere consapevoli che l'esercizio di tale potere di risoluzione o anche la proposta di un tale potenziale esercizio nei confronti dell'Emittente potrebbe avere un effetto negativo sostanziale sui diritti dei portatori dei Titoli e potrebbe portare a una perdita di parte o della totalità dell'investimento. Il regime di risoluzione è concepito per essere attivato prima dell'insolvenza dell'ente in questione e i portatori dei titoli emessi da tale istituzione potrebbero non essere in grado di anticipare l'esercizio di alcun potere di risoluzione (compreso l'esercizio dello strumento del "bail-in") da parte dell'autorità di risoluzione del Regno Unito. Inoltre, i portatori dei titoli emessi da un'istituzione che è stata sottoposta a un regime di risoluzione avranno diritti molto limitati di contestare l'esercizio dei poteri da parte dell'autorità di risoluzione del Regno Unito, anche se tali poteri hanno comportato la svalutazione dei titoli o la conversione dei titoli in azioni (rischi connessi ai poteri di risoluzione)

Diritti connessi ai Titoli

I Titoli (e ciascuna lite, controversia, procedimento o reclamo di qualsiasi natura (sia contrattuale, extra-contrattuale o altro) derivante o relativa agli Strumenti (*Instruments*) o la loro formazione) saranno regolati e interpretati in conformità con il diritto inglese.

I Titoli danno il diritto a ciascun portatore dei Titoli di ricevere un potenziale rendimento sui Titoli, insieme ad alcuni diritti accessori a ricevere la notifica di specifiche determinazioni ed eventi.

Il rendimento sui Titoli comprenderà l'Importo di Regolamento e gli importi pagabili dipenderanno dall'andamento dell'/delle Attività Sottostante/Sottostanti come descritta/e nelle seguenti sottosezioni.

Importo di Rimborso Anticipato Non Programmato:

I Titoli possono essere rimborsati prima della scadenza programmata (i) a scelta dell'Emittente (a) qualora l'Emittente determini che un cambiamento nella legge applicabile abbia l'effetto di rendere la prestazione dell'Emittente o delle sue società collegate ai sensi dei Titoli o gli accordi di copertura relativi ai Titoli (o vi sia una sostanziale probabilità che lo diventino in un immediato futuro) illegali o irrealizzabili (in tutto o in parte), (b) ove applicabile, qualora l'Agente di Calcolo determini che taluni ulteriori eventi di turbativa o eventi di rettifica come previsti nei termini e condizioni dei Titoli si siano verificati in relazione all'attività sottostante o (ii) previa comunicazione da parte di un Portatore che dichiari tali Titoli immediatamente esigibili a causa del verificarsi di un evento di default che sia ancora in corso. In tal caso, l'Importo di Rimborso Anticipato Non Programmato pagabile in relazione a tale rimborso anticipato non programmato sarà, per ciascun Titolo, un importo che rappresenti il valore equo di mercato (*fair market value*) del Titolo, tenendo in considerazione tutti i fattori rilevanti come previsti nei termini e condizioni degli Strumenti (*Instruments*).

Importo di Regolamento:

A meno che non sia stato precedentemente rimborsato, o acquistato e cancellato, l'Importo di Regolamento pagabile in relazione a ciascun Titolo alla data di scadenza sarà:

C'è una garanzia che assiste i Titoli?
No, non c'è una garanzia che assiste i Titoli.
Quali sono i rischi principali che sono specifici per i Titoli?
<p>I fattori di rischio specifici relativi ai Titoli sono descritti di seguito:</p> <ul style="list-style-type: none"> Il prezzo di emissione originario dei Titoli supererà il valore stimato dei Titoli a partire dalla data di negoziazione, come determinato facendo riferimento ai modelli di prezzo dell'Emittente e tenendo conto degli spread creditizi dell'Emittente. La differenza tra il valore stimato dei Titoli dal momento in cui i termini e le condizioni dei Titoli sono stati fissati alla data di negoziazione e il prezzo di emissione originale è il risultato di molti fattori, incluse tra le altre all'emissione (lo sconto di sottoscrizione e le commissioni ove consentito dalla legge applicabile), le spese sostenute per creare, documentare e commercializzare i Titoli e i costi di finanziamento interni dell'Emittente (ossia un importo basato su quanto l'Emittente pagherebbe ai portatori di uno strumento finanziario non strutturato con scadenza analoga). La differenza potrebbe essere maggiore qualora i Titoli vengano inizialmente negoziati sui mercati secondari e potrebbe gradualmente diminuire di valore durante la vita dei Titoli. <p>Rischi relativi a determinate caratteristiche dei Titoli:</p> <ul style="list-style-type: none"> I termini e le condizioni dei Titoli prevedono che il rendimento dei Titoli dipenda dalla performance dell'Attività Sottostante, in modo che l'investitore sarà esposto alla performance dell'Attività Sottostante. Ciò significa che, se l'Attività Sottostante non soddisfa una relativa soglia per il calcolo dell'importo di rimborso, l'investitore potrebbe perdere parte o tutto il proprio investimento iniziale. I termini e le condizioni dei Titoli prevedono che i Titoli siano soggetti a un cap, in modo che la possibilità dell'investitore di partecipare a qualsiasi variazione del valore della/e Attività Sottostante/i durante la vita dei Titoli sarà limitata, indipendentemente da quanto il livello, il prezzo, il tasso o altro valore applicabile del/i Sottostante/i possano aumentare oltre il livello di cap durante la vita dei Titoli. Di conseguenza, il rendimento dei Titoli potrebbe essere significativamente inferiore rispetto a quello generato se l'investitore avesse acquistato direttamente l'Attività Sottostante. <p>Rischi relativi alle Attività Sottostanti</p> <ul style="list-style-type: none"> Il rendimento dei Titoli dipende dall'andamento della/e Attività Sottostante/i. Il livello, il prezzo, il tasso, il valore patrimoniale netto o altro valore applicabile della/e Attività Sottostante/i può essere soggetto a variazioni imprevedibili nel tempo. Tale grado di cambiamento è noto come "volatilità". La volatilità dell'Attività Sottostante può essere condizionata da eventi nazionali o internazionali di natura finanziaria, politica, militare o economica, incluse azioni governative, o da azioni di partecipanti ai relativi mercati. Ciascuno di questi eventi o attività potrebbe condizionare negativamente il valore e il rendimento dei Titoli. L'investitore non dovrebbe considerare un'informazione sull'andamento passato della/e Attività Sottostante/i come indicativa della portata delle, o delle tendenze alle, fluttuazioni della/e Attività Sottostante/i che potrebbero verificarsi in futuro. La/Le Attività Sottostante/i possono avere un andamento diverso (o uguale) rispetto al passato, e ciò potrebbe avere effetti negativi significativi sul valore e sul rendimento dei Titoli. La performance delle Azioni dipende da fattori macroeconomici, come interessi e livelli di prezzo sui mercati dei capitali, andamenti valutari, fattori politici nonché fattori specifici relativi alla società quali utili, posizione di mercato, situazione di rischio, struttura azionaria e politica di distribuzione, nonché i rischi aziendali affrontati dagli emittenti stessi. Ciascun fattore o una combinazione di essi potrebbe influire negativamente sulla performance dell/delle Attività Sottostante/i che, a sua volta, avrebbe un effetto negativo sul valore e sul rendimento dei Titoli dell'investitore. Diversi fattori imprevedibili potrebbero influenzare la performance degli Exchange Traded Fund. Un Exchange Traded Fund potrebbe tentare di replicare la performance di un indice (in relazione a tale Exchange Traded Fund, un "Indice ETF Sottostante"), o la performance di certe attività, contratti e/o strumenti che potrebbero essere investiti nel, o mantenuti dal, Exchange Traded Fund. La performance di un Exchange Traded Fund potrebbe dipendere da fattori specifici relativi alla società, quali utili, la posizione sul mercato, situazione di rischio, struttura azionaria e politica di distribuzione delle società sottostanti che costituiscono l'Indice ETF sottostante di tale Exchange Traded Fund, o sul valore di tali attività, contratti e/o strumenti investiti nel, mantenuti da o replicati dall'Exchange Traded Fund oltre a fattori macroeconomici, quali livelli di interessi e prezzi nel mercato dei titoli, sviluppi relativi alle valute e fattori politici. Commissioni imposte dal gestore dell'Exchange Traded Fund potrebbero ridurre la performance del fondo rispetto all'indice ETF sottostante. Il rendimento dei Titoli non sarà collegato a dividendi o a qualsiasi altra distribuzione pagata sulle Azioni. Di conseguenza, gli investitori possono ricevere un rendimento inferiore sui Titoli rispetto a quello che avrebbero ricevuto se avessero investito direttamente nell/nelle Attività Sottostante/i. I Titoli possono essere rettificati o rimborsati prima della scadenza a causa di un evento di turbativa aggiuntivo (es. una modifica della legge, un'operazione di copertura o un incrementato costo di copertura). Tali aggiustamenti possono avere un effetto negativo sul valore e sul rendimento dei Titoli e l'importo ricevuto dall'investitore in seguito a rimborso anticipato potrebbe essere inferiore all'investimento iniziale.
