Otherwise, the investor will receive a Cash Settlement calculated as the Nominal Amount multiplied by the Performance of the Underlying with the Worst Performance, as described under "Redemption".

Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the Product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/ or their stock exchanges or markets taking place during the term or upon maturity of the Products. Such occurrences can have an effect on the time of redemption and/ or on the value of the Products.

Illiquidity Risk

One or, if applicable, more of the Underlyings might be or become illiquid over the life time of the Product.

Illiquidity of an Underlying might lead to larger bid/ offer spreads of the Product and/ or to an extended time period for buying and/ or selling the Underlying respective to acquire, unwind or dispose of the hedging transaction(s) or asset(s) or to realise, recover or remit the proceeds of such hedging transaction(s) or asset(s) which might implicate a postponed redemption or delivery and/ or a modified redemption amount, as reasonably determined by the Calculation Agent.
