9. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). The Issuer has determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

What are the key risks that are specific to the Issuer?

Marex Financial is a consolidated subsidiary of Marex Group plc. Therefore, the ability of Marex Financial to fulfil its obligations under the Securities is affected, substantially, by the same risks as those that affect the business and operations of Marex Group as a whole, meaning Marex Group plc and its consolidated subsidiaries, including Marex Financial ("Marex Group" or the "Group"). The Group is subject to the following key risks:

- The Group generates revenue primarily from the commissions it earns and the spreads it makes from facilitating and executing client orders. These revenue sources are substantially dependent on client trading volumes and commodity pricing levels, which are affected by a wide range of factors, many of which are beyond the Group's control. Any decreases in trading volumes or pricing levels may significantly reduce the commissions the Group earns and the spreads the Group makes from facilitating and executing client orders and therefore have a material adverse effect on the Group's business, financial condition, results of operations and prospects.
- The Group requires substantial financial liquidity to facilitate its operations. The Group's business involves the establishment and carrying of substantial open positions for clients on exchanges and in the OTC derivatives markets. The Group is required to post and maintain margin or credit support for these positions. Failure by the Group to fund margin calls and other operating activities or a general lack of sufficient liquidity may prohibit the Group from developing, enhancing and growing its business, taking advantage of future opportunities and responding to competitive pressure, any of which may have a material adverse effect on the Group's business, financial condition, results of operations and prospects.
- The Group operates in a highly regulated environment. The Group's business includes multiple entities that are regulated by financial services regulators in different jurisdictions. The Group's failure to comply with applicable regulatory requirements, including with respect to anti-financial crime regulations (including those pertaining to sanctions, AML, anti-corruption tax evasion and fraud), regulatory capital requirements, conduct of business, governance, reporting obligations and oversight of its internal control environment, could subject the Group to regulatory enforcement or other actions. Any failure by the Group to address these rules or any other issues or any future supervisory action, investigations or enforcement actions could adversely affect the Group's reputation, could result in losses of clients and employees, a reduced ability to compete effectively, financial losses and potential litigation and regulatory actions and penalties against the Group.
- The majority of the requirements of the BRRD have been implemented in the UK through the UK Banking Act 2009 (as amended and related statutory instruments, the "UK Banking Act"). The UK Banking Act is directly applicable to UK financial institutions. Marex Financial is an investment firm to which section 89A of the Banking Act 2009 provides for modified application of the resolution regime that applies to banks under Part 1 of the Banking Act 2009. Even though Marex Group plc is not a bank, the Group is nevertheless subject to the UK Banking Act due to its regulated subsidiaries, such as Marex Financial. Investors should be aware that the exercise of any such resolution power or even the suggestion of any such potential exercise in respect of the Issuer could have a material adverse effect on the rights of holders of Securities, and could lead to a loss of some or all of the investment. The resolution regime is designed to be triggered prior to insolvency of the relevant institution, and holders of securities issued by such institution may not be able to anticipate the exercise of any resolution power (including exercise of the "bail-in" tool) by the UK resolution authority. Further, holders of securities issued by an institution which has been taken into a resolution regime will have very limited rights to challenge the exercise of powers by the UK resolution authority, even where such powers have resulted in the write down of the securities or conversion of the securities to equity.

What are the key risks that are specific to the Securities?
The specific risk factors related to the Securities are described below: - The original issue price for the Securities will exceed the estimated value of the Securities as from the trade date, as determined by reference to the Issuer's pricing models and taking into account the Issuer's credit spreads. The difference between the estimated value of the Securities as of the time the terms and conditions of the Securities were set on the trade date and the original issue price is a result of many factors, including among others on issuance (the underwriting discount and commissions where permitted by applicable law), the expenses incurred in creating, documenting and marketing the Securities and the Issuer's own internal funding costs (being an amount based on what the Issuer would pay to holders of a non-structured security with a similar maturity). The difference may be greater when the Securities are initially traded on any secondary markets and may gradually decline in value during the term of the Securities. Risks relating to certain features of the Securities: - The coupon payment is conditional on a certain event (referred to as Coupon Event) in relation to the Underlying Asset(s) (e.g. the Underlying Asset(s) reaching or exceeding a certain threshold value on a specified date). Should such Coupon Event not occur, there would be no coupon payment for the applicable Coupon Payment Date. Security Holders should note that they will not receive a coupon payment during the entire term of the Securities, as the case may be, if the prerequisites are not met on a date relevant for the determination of the coupon payment. - The terms and conditions of the Securities provide that the return on the Securities depends on the 'worst-of' performance of the basket of Underlying Assets, so that the investor will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any one or more Underlying Assets fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, the investor may receive no interest payments and/or could lose some or all of the initial investment. - If the value of the relevant Underlying Asset on the Final Reference Date is below a specific threshold the Securities may result in significant losses. The lower the value of the relevant Underlying Asset in the basket on the Final Reference Date, the lower the Settlement Amount. A total loss (other than potential coupon payment(s)) occurs when the relevant Underlying Asset is worthless on the Final Reference Date. Risks relating to the Underlying Assets - The return on the Securities may depend on the performance of one or more Underlying Asset(s). The level, price, rate, net asset value or other applicable value of the Underlying Asset(s) may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. - The investor should not regard any information about the past performance of the Underlying Asset(s) as indicative of the range of, or trends in, fluctuations in the Underlying Asset(s) that may occur in the future. Underlying Asset(s) may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on the Securities. - Equity indices are comprised of a synthetic portfolio of shares, and as such, the performance of an Index is dependent upon the macroeconomic factors relating to the shares that underlie such Index, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as the index composition, which may change over time. - The sponsor of the Index(s) will have no involvement in the offer and sale of the Securities and will have no obligation to the investor as a holder of Securities. For example, the sponsor can add, delete or substitute the components of an index at its discretion, and may also alter the methodology used to calculate the level of the Index. The sponsor may also alter, discontinue or suspend calculation or dissemination of the Index. Any of these actions may have a detrimental impact on the level of the Index, which in turn could have a negative impact on the value of and return on the Securities. - The Securities may be adjusted or redeemed prior to maturity due to the occurrence of an additional disruption event (i.e. a change in law, a hedging disruption or increased cost of hedging). Any such adjustment may have an adverse effect on the value of and return on the Securities and the amount the investor receives following an early redemption may be less than the initial investment. - The Securities are linked to a basket of Underlying Assets so that the investor is exposed to the performance of such basket and bear the risk that such performance cannot be predicted and is determined by macroeconomic factors relating to the constituents that comprise such basket, all as described above in relation to each particular type of Underlying Asset. - Marex acts as a broker, trader, research provider and market maker. In those and other capacities, Marex purchases, sells or holds a broad array of investments, actively trades securities, derivatives, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for its own account, and will have other direct or indirect interests, in the global fixed income, currency, commodity, equity and other markets. Any of the financial market activities of Marex may, individually or in the aggregate, have an adverse effect on the market for the Securities, and an investor should expect that the interests of Marex or its clients or counterparties will at times be adverse to those of investors in the Securities.

Quali sono i principali rischi che sono specifici per l'Emittente?		
Marex Financial è una società controllata da Marex Group plc. Pertanto, la capacità di Marex Financial di adempiere ai propri obblighi in relazione ai Titoli è influenzata, sostanzialmente, dagli stessi rischi che riguardano l'attività e le operazioni di Marex Group nel suo complesso, vale a dire Marex Group plc e le sue società controllate, inclusa Marex Financial ("Marex Group" o il "Gruppo"). Il Gruppo è soggetto ai seguenti rischi principali: - Il Gruppo genera ricavi principalmente dalle commissioni che guadagna e dagli spread che ottiene facilitando ed eseguendo gli ordini dei clienti. Queste fonti di reddito dipendono sostanzialmente dai volumi di negoziazione dei clienti e dai livelli dei prezzi delle materie prime, che sono influenzati da un'ampia gamma di fattori, molti dei quali sfuggono al controllo del Gruppo. Eventuali diminuzioni dei volumi di negoziazione o dei livelli dei prezzi possono ridurre significativamente le commissioni che il Gruppo guadagna e gli spread che il Gruppo ottiene facilitando ed eseguendo gli ordini dei clienti e quindi avere un effetto negativo rilevante sull'attività, sulla condizione finanziaria, sui risultati delle operazioni e sulle prospettive del Gruppo. - Il Gruppo necessita di una sostanziale liquidità finanziaria per facilitare le proprie operazioni. L'attività del Gruppo implica la creazione e la gestione di posizioni aperte sostanziali per i clienti nelle borse e nei mercati dei derivati OTC. Il Gruppo è tenuto a depositare e mantenere un margine o un sostegno creditizio per queste posizioni. L'incapacità del Gruppo di finanziare le richieste di margini e altre attività operative o una generale mancanza di liquidità sufficiente può impedire al Gruppo di sviluppare, potenziare e far crescere la propria attività, di trarre vantaggio da opportunità future e di rispondere alla pressione della concorrenza, tutti fattori che possono avere un effetto negativo rilevante sull'attività, sulla condizione finanziaria, sui risultati delle operazioni e sulle prospettive del Gruppo. - Il Gruppo opera in un ambiente altamente regolamentato. L'attività del Gruppo comprende molteplici entità regolamentate da autorità di regolamentazione dei servizi finanziari in diverse giurisdizioni. La mancata conformità del Gruppo ai requisiti normativi applicabili, anche per quanto riguarda le normative anti-crimine finanziario (incluse quelle relative a sanzioni, AML, evasione fiscale e frode anticorruzione), requisiti di capitale normativo, condotta aziendale, governance, obblighi di rendicontazione e supervisione del suo ambiente di controllo interno, potrebbe sottoporre il Gruppo a misure di applicazione della normativa o ad altre azioni. Qualsiasi inadempienza da parte del Gruppo nell'affrontare queste normative o questi o altri problemi o qualsiasi futura azione di vigilanza, indagine o azione esecutiva potrebbe influire negativamente sulla reputazione del Gruppo, potrebbe comportare la perdita di clienti e dipendenti, una ridotta capacità di competere efficacemente, perdite finanziarie e potenziali contenziosi e azioni normative e sanzioni contro il Gruppo. - La maggior parte dei requisiti della BRRD è stata implementata nel Regno Unito attraverso lo UK Banking Act del 2009, come modificato, e i relativi atti legislativi (lo "UK Banking Act"). Lo UK Banking Act è direttamente applicabile alle istituzioni finanziarie del Regno Unito. Marex Financial è una società di investimento per la quale la sezione 89A del Banking Act del 2009 prevede un'applicazione modificata del regime di risoluzione che si applica alle banche ai sensi della Parte 1 del Banking Act del 2009. Anche se Marex Group plc non è una banca, il Gruppo è comunque soggetto allo UK Banking Act a causa delle sue società controllate regolamentate, come Marex Financial. Gli investitori dovrebbero essere consapevoli che l'esercizio di tale potere di risoluzione o anche la proposta di un tale potenziale esercizio nei confronti dell'Emittente potrebbe avere un effetto negativo sostanziale sui diritti dei portatori dei Titoli e potrebbe portare a una perdita di parte o della totalità dell'investimento. Il regime di risoluzione è concepito per essere attivato prima dell'insolvenza dell'ente in questione e i portatori dei titoli emessi da tale istituzione potrebbero non essere in grado di anticipare l'esercizio di alcun potere di risoluzione (compreso l'esercizio dello strumento del "bail-in") da parte dell'autorità di risoluzione del Regno Unito. Inoltre, i portatori dei titoli emessi da un'istituzione che è stata sottoposta a un regime di risoluzione avranno diritti molto limitati di contestare l'esercizio dei poteri da parte dell'autorità di risoluzione del Regno Unito, anche se tali poteri hanno comportato la svalutazione dei titoli o la conversione dei titoli in azioni.

Importo di Rimborso Anticipato Non Programmato:

I Titoli possono essere rimborsati prima della scadenza programmata (i) a scelta dell'Emittente (a) qualora l'Emittente determini che un cambiamento nella legge applicabile abbia l'effetto di rendere la prestazione dell'Emittente o delle sue società collegate ai sensi dei Titoli o gli accordi di copertura relativi ai Titoli (o vi sia una sostanziale probabilità che lo diventino in un immediato futuro) illegali o irrealizzabili (in tutto o in parte), (b) ove applicabile, qualora l'Agente di Calcolo determini che taluni ulteriori eventi di turbativa o eventi di rettifica come previsti nei termini e condizioni dei Titoli si siano verificati in relazione all'attività sottostante o (ii) previa comunicazione da parte di un Portatore che dichiara tali Titoli immediatamente esigibili a causa del verificarsi di un evento di default che sia ancora in corso. In tal caso, l'Importo di Rimborso Anticipato Non Programmato pagabile in relazione a tale rimborso anticipato non programmato sarà, per ciascun Titolo, un importo che rappresenti il valore equo di mercato (*fair market value*) del Titolo, tenendo in considerazione tutti i fattori rilevanti come previsti nei termini e condizioni degli Strumenti (*Instruments*).

Importo di Regolamento:

A meno che non sia stato precedentemente esercitato in anticipo, o acquistato e cancellato, l'Importo di Regolamento pagabile in relazione a ciascun Titolo alla Data di Scadenza sarà:

Qualora non si sia verificato un Evento Barriera, l'Importo di Regolamento pagabile in relazione a ciascun Titolo verrà calcolato secondo la seguente formula:

$$IC \times \text{Percentuale di Rimborso}.$$

Qualora si sia verificato un Evento Barriera, l'Importo di Regolamento pagabile in relazione a ciascun Titolo verrà calcolato secondo la seguente formula:

$$IC \times \frac{\text{Valore di Riferimento Finale}}{\text{Valore Iniziale}}$$

Termini definiti:

- IC: Importo di Calcolo, pari ad Euro 1.000,00.
- Prezzo di Chiusura Finale: rispetto a ogni Attività Sottostante, il Prezzo di Riferimento di tale Attività Sottostante alla Data di Riferimento Finale, soggetto a modifiche secondo i termini e condizioni.
- Data di Riferimento Finale: 22 luglio 2031.
- Valore di Riferimento Finale: il Valore Finale dell'Attività con Performance Finale Peggiore.
- Valore Finale: rispetto a un'Attività Sottostante, il Prezzo di Chiusura Finale dell'Attività Sottostante.
- Attività con Performance Finale Peggiore: l'Attività Sottostante del paniere con Rendimento Finale dell'Attività più basso inteso come Valore Finale diviso per il Valore Iniziale.
- Valore Iniziale: rispetto a ogni Attività Sottostante, 100,00 per cento (100,00%) del Prezzo Iniziale dell'Attività relativo a tale Attività Sottostante come determinato dall'Agente di Calcolo alla Data di Esercizio sulla base del prezzo ufficiale di chiusura di ogni Attività Sottostante a tale data.
- Percentuale di Rimborso: 100,00 per cento (100,00%).
- Prezzo di Riferimento: rispetto a ogni Attività Sottostante, il livello dell'Indice di chiusura dell'Attività Sottostante alla data corrispondente.

Evento Barriera:

Un "Evento Barriera" si verifica quando il Valore di Riferimento della Barriera è inferiore o uguale al Livello di Barriera.

Termini definiti:

- Livello di Barriera: rispetto a ogni Attività Sottostante, 50,00 per cento (50,00%) del Prezzo Iniziale dell'Attività relativo a tale Attività Sottostante (come determinato dall'Agente di Calcolo alla Data di Esercizio sulla base del prezzo ufficiale di chiusura di ogni Attività Sottostante a tale data.)
- Valore di Riferimento della Barriera: il Prezzo di Chiusura Finale di qualsiasi Attività Sottostante nel paniere.

Rango relativo ai Titoli

I Titoli costituiscono obbligazioni dirette, non subordinate, incondizionate e non garantite dell'Emittente e sono parimenti ordinate tra di loro e con tutte le altre obbligazioni dirette non subordinate e non garantite dell'Emittente.
Limitazioni alla libera trasferibilità dei Titoli
Fatte salve eventuali restrizioni alla vendita, i Titoli saranno liberamente trasferibili.
Dove verranno negoziati i Titoli?
Domanda di ammissione alle negoziazioni in un mercato regolamentato o alla negoziazione su un MTF
Mercato EuroTLX di Borsa Italiana (un sistema multilaterale di negoziazione organizzato e gestito da Borsa Italiana).
C'è una garanzia che assiste i Titoli?
No, non c'è una garanzia che assiste i Titoli.
Quali sono i rischi principali che sono specifici per i Titoli?
I fattori di rischio specifici relativi ai Titoli sono descritti di seguito: - Il prezzo di emissione originario dei Titoli supererà il valore stimato dei Titoli a partire dalla data di negoziazione, come determinato facendo riferimento ai modelli di prezzo dell'Emittente e tenendo conto degli spread creditizi dell'Emittente. La differenza tra il valore stimato dei Titoli dal momento in cui i termini e le condizioni dei Titoli sono stati fissati alla data di negoziazione e il prezzo di emissione originale è il risultato di molti fattori, incluse tra le altre all'emissione (lo sconto di sottoscrizione e le commissioni ove consentito dalla legge applicabile), le spese sostenute per creare, documentare e commercializzare i Titoli e i costi di finanziamento interni dell'Emittente (ossia un importo basato su quanto l'Emittente pagherebbe ai portatori di uno strumento finanziario non strutturato con scadenza analoga). La differenza potrebbe essere maggiore qualora i Titoli vengano inizialmente negoziati su mercati secondari e potrebbe gradualmente diminuire di valore durante la vita dei Titoli. Rischi relativi a determinate caratteristiche dei Titoli: - Il pagamento della cedola (<i>coupon</i>) è condizionato ad un determinato evento (denominato Evento del Coupon) in relazione alla/e Attività Sottostante/i (i.e. la/e Attività Sottostante/i raggiunge/raggiungono o supera/superano una determinata soglia di valore ad una data specifica). Se tale Evento del Coupon non si verificasse, non vi sarebbe alcun pagamento della cedola (<i>coupon</i>) alla Data di Pagamento del Coupon applicabile. I Portatori dei Titoli devono tenere presente che non riceveranno il pagamento della cedola (<i>coupon</i>) durante l'intera durata dei Titoli, a seconda dei casi, se i presupposti non sono soddisfatti in una data rilevante per la determinazione del pagamento della cedola (<i>coupon</i>). - I termini e le condizioni dei Titoli prevedono che il rendimento dei Titoli dipenda dalla performance <i>peggiore</i> del paniere di Attività Sottostanti, in modo che l'investitore sarà esposto alla performance di ciascuna Attività Sottostante e, in particolare, all'Attività Sottostante che ha la performance peggiore. Ciò significa che, indipendentemente dal quale sia la performance delle altre Attività Sottostanti, se uno o più Attività Sottostanti non soddisfano una relativa soglia o barriera per il pagamento degli interessi o il calcolo dell'importo di rimborso, l'investitore potrebbe non ricevere il pagamento degli interessi e/o potrebbe perdere parte o tutto il proprio investimento iniziale. - Se il valore della relativa Attività Sottostante alla Data di Riferimento Finale è inferiore ad una specifica soglia, i Titoli potrebbero subire perdite significative. Minore è il valore della relativa Attività Sottostante nel paniere alla Data di Riferimento Finale, minore sarà l'Importo di Regolamento. Una perdita totale (diversa dal potenziale pagamento della/e cedola/e) si verifica quando la relativa Attività Sottostante è priva di valore alla Data di Riferimento Finale. Rischi relativi alle Attività Sottostanti - Il rendimento dei Titoli dipende dall'andamento della/e Attività Sottostante/i. Il livello, il prezzo, il tasso, il valore patrimoniale netto o altro valore applicabile della/e Attività Sottostante/i può essere soggetto a variazioni imprevedibili nel tempo. Tale grado di cambiamento è noto come "volatilità". La volatilità dell'Attività Sottostante può essere condizionata da eventi nazionali o internazionali di natura finanziaria, politica, militare o economica, incluse azioni governative, o da azioni di partecipanti ai relativi mercati. Ciascuno di questi eventi o attività potrebbe condizionare negativamente il valore e il rendimento dei Titoli. - L'investitore non dovrebbe considerare un'informazione sull'andamento passato della/e Attività Sottostante/i come indicativa della portata delle, o delle tendenze alle, fluttuazioni della/e Attività Sottostante/i che potrebbero verificarsi in futuro. La/Le Attività Sottostante/i possono avere un andamento diverso (o uguale) rispetto al passato, e ciò potrebbe avere effetti negativi significativi sul valore e sul rendimento dei Titoli. - Gli indici azionari sono costituiti da un portafoglio sintetico di azioni, e in quanto tale, l'andamento di un Indice dipende dai fattori macroeconomici relativi alle azioni che sono alla base di tale Indice, come interessi e livelli di prezzo sui mercati dei capitali, sviluppi valutari, fattori politici così come fattori specifici relativi alla società quali utili, posizione di mercato, situazione di rischio, struttura azionaria e politica di distribuzione, nonché la composizione dell'indice, che può cambiare nel tempo. - Lo sponsor dell'/degli Indice/i non avrà alcun coinvolgimento nell'offerta e vendita dei Titoli e non avrà alcun obbligo nei confronti dell'investitore in qualità di portatore dei Titoli. Ad esempio, lo sponsor può aggiungere, eliminare o sostituire i componenti di un indice a sua discrezione e può anche modificare la metodologia utilizzata per calcolare il livello dell'Indice. Lo sponsor può inoltre modificare, interrompere o sospendere il calcolo o la diffusione dell'Indice. Ognuna di queste azioni può avere un impatto dannoso sul livello dell'Indice, che a sua volta potrebbe avere un impatto negativo sul valore e sul rendimento dei Titoli. - I Titoli possono essere rettificati o rimborsati prima della scadenza a causa di un evento di turbativa aggiuntivo (es. una modifica della legge, un'operazione di copertura o un incrementato costo di copertura). Tali aggiustamenti possono avere un effetto negativo sul valore e sul rendimento dei Titoli e l'importo ricevuto dall'investitore in seguito a rimborso anticipato potrebbe essere inferiore all'investimento iniziale. - I Titoli sono collegati a un paniere di Attività Sottostanti in modo che l'investitore sia esposto alla performance di tale paniere e si assuma il rischio che tale performance non possa essere previsto e sia determinato da fattori macroeconomici relativi agli elementi che compongono tale paniere, il tutto come sopra descritto in relazione a ciascuna particolare tipologia di Attività Sottostante. - Marex agisce come broker, trader, fornitore di ricerche e market maker.
